4. On the next page, create a user ID that is at least 6 characters long. It must be unique so that no other user has the same one. Next, choose a password that is at least 8 characters long and has at least one number in it. Not all special characters are allowed. See “rules” for a list. Last, choose 3 security questions by clicking on the word select then clicking on the preferred question so it appears in the box instead of the word Select, and then type your answer to the right. Every time you log in we will ask one question. We have you set three questions so if you make a mistake we can offer you another chance.
